

My name is Cliff Floyd and I have been a Major League Baseball player for 15 years. My body has taken a beating.... Due to that I have suffered many injuries. Surgery on both wrists, both knees, both Achilles and many shoulder issues. Through the years I have never found anything or anyone that could give me the remedy or relief I needed. Until now... Dr. Bernard Burton has changed my body and therefore changed my life. I was coming to terms with the fact that I might have to retire when a friend recommended I see Dr. Burton. After working with him over the last month, I am off to play my 16th year with the San Diego Padres. For the first time in years my body moves and feels like I never thought it could.

Thank you so much Dr. Burton.

Sincerely,

Cliff Floyd
